Summary

Passionate about leveraging technology to drive innovation, I'm Ahmad Saghir, a dynamic Software Engineering graduate with over six years of hands-on experience as a Freelance Software Engineer. Proficient in HTML, CSS, JavaScript, Laravel, Python, and more, my journey started with an enriching internship at Boraq Solutions. I implemented PHP and Laravel to develop a robust blog website, igniting my passion for web development.

In my current role as E-commerce Operations Manager at Tulip Home, I spearhead the orchestration of e-commerce operations, managing websites, and emails, and leveraging Notion for CRM. Overseeing shipping contracts, billing, and invoices, I've been instrumental in enhancing operational efficiency. Continuous learning is my forte, reflected in a spectrum of certifications, from foundational web development principles to mastering Git and GitHub.

With a quest for extensive knowledge, my goal is to evolve into a proficient MERN (MongoDB, ExpressJS, ReactJS, NodeJS) Fullstack Developer. Specializing in Object-Oriented Programming (OOP) and Design Patterns, I bring a holistic approach to web application development. Proficient in problem-solving and relational databases, I demonstrate expertise in Git, Github, MySQL, and PhpMyAdmin. Fluent in Arabic, English, and Turkish, effective communication is a cornerstone of my work.

My skills extend to software project management using various UML diagrams, showcasing a comprehensive understanding of project structures. I also excel in task management, utilizing tools like Trello and Notion to ensure streamlined and efficient project workflows.

My career is characterized by impactful projects, such as the revolutionary Hospital Automation and dynamic Blog projects, showcasing my ability to innovate and deliver user-centric solutions. Let's connect and explore possibilities together! Feel free to contact me via email at ahmad.saghir.1999@gmail.com.

Experience
